5. Efficient Working Environment

Efficient working environment

	I believe hybrid working conditions positively impact my daily work	I feel confindent in using digital tools and technologies to deliver the expected results	The tools and resources (work equipment, information Technology, systems, etc.) we have in place allow me to perform my job effectively	In my unit, the workload is fairly distributed among all its members	In my unit, work precesses allow the staff to be as efficient as possible	I feel that, at F4E, changes (organisational, regulatory...) are managed effectively
